Sean Yuan is the co-founder and general manager for Invent Heating & Refrigeration Inc based in Shanghai, China. Founded in 2008, Invent Inc. is a manufacturing company that specializes in casted and precision machined parts. Sean sets his company apart by combining a high set of technical expertise while upholding the high standards and practices of leading manufacturing standards. Invent's current customers include several top 10 companies in their respective markets.

Yuan has always had a strong focus on engineering and manufacturing. Sean obtained his Bachelor's degree in Engine Manufacturing Engineering at the Beijing University of Aeronautics & Astronautics and furthered his education with master's degree in industrial & Mechanical engineering at Ohio's Wright State University. He began his career at Gradal company (manufacturer of hydraulic excavators) in New Philadelphia, Ohio as a senior Industrial Engineer and was then the Program Manager at Emerson Climate Technologies (HVAC systems) where he led the initiative to set up two of the company's latest plants in Shenyang (reciprocating compressor) and Suzhou, China (scroll compressor.) Subsequently, he pursued a role at IBCC Industrial company (metal fabrication) as the General Manager for two plants in Shanghai and Guangdong, China. With a passion for business, he then accomplished his goal of opening up his company and is now highly successful in his industry.
